Razor ad brief: "The Back-Pocket Brick" (Oct 27 2026)

Product: The Razor | RFID Smart Leather Wallet for Men. Rs 2,450 (compare-at 2,999), 6 colours, 67 in stock, 4.8 stars from 20 reviews. Cards sit inside a leather sleeve and come out with a thumb push through the notch. Cash sits under the strap on the back. Not made to order, so COD is available.

Why the earlier Razor ads failed

- They sold **RFID**. Very few Pakistani buyers carry contactless cards, so the fear doesn't land. Our own wallet blog article says RFID "does nothing" without a contactless card.
- They **explained** the wallet. Neither showed a problem the viewer feels in their own pocket.
- Results: TOF-B Razor spent 28,060 lifetime at 2.44x Meta (about 1.2x real). The second video dropped CTR from 1.77% to 0.98%.
- What has worked in this account: **founder voice** (TOF-M Mocha Mate founder videos producing real, UTM-tagged Shopify orders).
- ⚠️ The "Razor UGC post, 295 likes" was a paid UGC ad padded with bogus likes and fake comments (user, Oct 27 2026). It is NOT evidence that Roman Urdu wins. Language is therefore a test variable: run the winning hook in a Roman Urdu cut and an English-caption cut and let orders decide.

The idea

Pakistani men carry a fat bifold in the back pocket and sit on it all day, on a bike or in a car. The Razor goes in the front pocket. We don't say "minimalist" or "RFID". We show the brick, empty it, and move what matters into the Razor in one take.

Script (25–28 s, 9:16, hands + founder voice, Roman Urdu VO, English subtitles)

Time	Picture	VO (Roman Urdu)	On-screen text
0–2	HOOK, three versions below		
2–8	Fat bifold emptied onto a wooden table: receipts, old cards, a folded bill	"Is mein se aadhi cheezein aap ne chhe mahine se nahi dekhi."	Aadha kachra
8–14	Cards slide into the Razor, cash goes under the strap. Then one thumb pushes a card out through the notch	"Cards andar, cash peeche. Ek ungli se card bahar."	Ek ungli. Ek second.
14–18	Edge-on: the old bifold and the loaded Razor side by side, ruler beside them	"Ab farq dekhein."	(real measured mm, both)
18–23	Razor slides into the FRONT jeans pocket. Founder sits on the bike or car seat	"Aur yeh aage ki pocket mein. Peeche kuch nahi."	Back pocket khaali
23–28	All 6 colours fanned on the table, end card, brass snap sonic logo	"Asli leather. Chhe rang."	The Razor · Rs 2,450 · Cash on delivery

Three hooks (same body, test all three)

- **H-A "Roz is pe baithte ho"**: founder sits on a car seat with the fat wallet in the back pocket and shifts uncomfortably. Text: "Aap roz is pe baithte ho."

- **H-B "The thud"**: the stuffed bifold drops on the table with a heavy thud, then the loaded Razor drops with a soft tap. Text: "Ek brick. Ek Razor."
- **H-C "Metal wallet"** (only if you can borrow a metal card wallet): tap it on the table, loud clank, then the Razor, silent. Text: "Metal nahi. Leather." Never name Ridge on screen or in copy.

Shoot notes (you shoot, Claude edits)

- Face the window. Your test photos are backlit, which turns the leather muddy.
- Wooden table or the brown leather offcut. No bedsheet or tiles.
- Props: a really stuffed old bifold (borrow one), a ruler, jeans with a front pocket, a bike or car seat, all 6 Razor colours, real-looking cards.
- **Never show a real ID.** Your driving licence with its number was visible in the test photos. Use bank-style cards with the numbers turned away.
- Shoot each beat 3 times, phone locked at 1080p 30fps, and record VO in the same take or right after.
- Claude does the zooms, captions, music (CC0), SFX (thud, slide, snap), grade, end card.

Ad copy (Roman Urdu primary)

Primary text:

> Back pocket mein mota wallet, aur roz us pe baithna. Razor mein cards andar, cash peeche strap mein, aur poora wallet aage ki pocket mein aa jata hai. Asli leather, chhe rang, Rs 2,450. Cash on delivery available.

- **Headline:** Aage ki pocket ka wallet

Money: the honest part

- Razor profit per PLACED order ≈ **Rs 1,029** (34% refusal, ADS_PLAYBOOK_PK.md).
- This account's cold CPA has been ≈ Rs 1,979, so an average ad loses money on the Razor. The ad must roughly halve CPA to break even.
- Test: one ad set, 3 ads (H-A/H-B/H-C), Rs 1,500/day, TOF-M targeting (9 cities, LLA 1%+3%, COD Refusers + Purchasers 180D + Delivered SEED excluded), Purchase optimisation, A+ creative off.
- Kill: Rs 2,500 spent with 0 Shopify orders by day 3. Pause any single hook with CTR under 1.5% at day 3.
- Scale: only if day-7 Shopify-verified placed CPA ≤ Rs 1,000 with ≥ 8 orders. Raise 20–30% every 3 days to 5,000. At 5,000/day and CPA 1,000 that is ~35 orders/week, enough to leave learning.
- Never put a free-delivery badge on a Razor creative (2,450 is under the Rs 5,500 threshold).
