KORDOVAN · META ADS OPERATING SYSTEM · NOV 2026

The Kordovan Funnel

How every rupee of Meta spend moves a stranger to a delivered order: the tiers, what each one is for, which ads, formats, hooks and styles go where, how we judge them, and when we stop, keep or scale. Blessed Friday runs inside this system.

Live from 13 Nov 2026 at PKR 3,000/day · PKR 5,000/day during Blessed Friday (26–30 Nov) and from 1 Dec

1 · The funnel at a glance

One rule ties it together: every tier is judged on **real Shopify orders** (each ad has its own tracking tag) and, 14 days later, on whether those orders were **delivered, not refused**. Meta's own count is never used alone: it over-reports by about 2x.

Why a funnel, and what it fixes for us

- **Cheaper new customers:** cold ads only have to start interest; warm tiers finish the job at a fraction of the cost.
- **Fewer COD refusals:** the middle tier answers "is it real leather / will what arrives match?" *before* the order, not at the door. October lost 25% of orders.
- **We learn what works where:** each ad is tagged by format, hook and style, so after 4–6 weeks we know, with evidence, which combination sells in which tier.
- **No more guessing on pauses:** stop/keep/scale rules are written down in advance (section 5).

2 · The tiers in detail

TOP · COLD

Strangers: find new buyers

WHO SEES IT

New people in the 9 cities. Meta's Advantage+ audience, steered by our lookalikes of real delivered buyers. Excludes site visitors, buyers and COD refusers.

WHAT IT MUST DO

Stop the scroll and earn a first visit and first order. Benefit: fills every tier below it.

FORMATS

Comparison (proven) · carousel (proven) · product close-up · office demo clips (hands + product) · value receipt

HOOKS

proof ("one is 6 months old, can you tell?") · **value** · **problem** (cold hands, coins everywhere) · **craft**

STYLES

studio (clean product) · lifestyle (dark heritage scene) · real (phone clips filmed in the office)

LIVE NOW

Mocha Mate H1 Comparison · Gloves W01 Comparison

WATCH

CTR ≥ 0.9% · cost per landing view · Shopify CPA vs product break-even

BUDGET

1,200 + 500 test (1,700 until the first test creative) → 2,000 + 500 from Dec 1

TEST · inside TOP

One new idea every week

A single challenger runs against the current best. It "graduates" to TOP or MIDDLE only after ≥ 2 Shopify orders at or under break-even with a normal refusal rate. Queue: FAQ, value-per-year, "our mistake", office demo clips, patina, countdowns.

MIDDLE · WARM

People who know us: remove doubt

WHO SEES IT

Product viewers (90 days) and site visitors (180 days) who have NOT added to cart or bought.

WHAT IT MUST DO

Answer the fear behind COD refusals: fake leather, wrong colour, no returns. Benefit: more orders that actually get delivered.

FORMATS

Ordered vs Arrived (real photo) · FAQ "You asked. We answered." · real reviews · patina before/after · comment replies

HOOKS

trust (COD, 7-day returns, what arrives) · **proof** · **craft**

STYLES

real first (phone photos/clips from the store and office), text-led for FAQ

LIVE NOW

Ordered vs Arrived: Mocha Mate (Ahsan's real photo)

WATCH

Shopify CPA AND **refusal rate per ad**: this tier wins by lowering refusals, not just CPA

BUDGET

500 → 1,000 from Dec 1 (merged into BOTTOM if the audience is too small)

BOTTOM · HOT

Ready to buy: close the sale

WHO SEES IT

Visitors, product viewers, add-to-cart and checkout starters, past buyers (catalogue retargeting).

WHAT IT MUST DO

Bring back people who nearly bought. Benefit: our cheapest orders (about 600–700 per order).

FORMATS

Catalogue (shows the exact product they viewed) · comparison · offer/countdown during sales

HOOKS

deadline (real dates only) · **saving** · **trust** (COD, free delivery over Rs 5,500)

STYLES

studio · catalogue product shots

LIVE NOW

Catalogue retargeting (renamed BOTTOM)

WATCH

Frequency (refresh above 6), Shopify CPA, refusals

BUDGET

800 → 1,500 from Dec 1

3 · Budget by period (PKR/day)

Period	Top	Test	Middle	Bottom	Blessed Friday	Total
13–25 Nov	1,700*	(0)*	500	800	–	**3,000**
26–30 Nov	1,700	–	500	800	+2,000 (1,200 warm · 800 cold)	**5,000**
From 1 Dec	2,000	500	1,000	1,500	–	**5,000**

*Test's 500 sits in Top until the first test creative is ready. Every ad set ≥ PKR 500/day (Meta's minimum is ~495).

4 · Every ad is tagged by what's in it

The ad's name is also its tracking tag in Shopify: **tier_product_format_hook_style_version**, e.g. `mof_mocha_orderedvsarrived_trust_real_v1`.

Dimension	Values we use
Format	comparison · carousel · static · video · receipt · objection · orderedvsarrived · faq · closeup · ugc · countdown · ourmistake
Hook	value · saving · proof · trust · status · gift · problem · deadline · craft
Style	lifestyle (dark heritage) · studio (clean product) · real (phone/UGC) · textled (headline-first)
Placement (from Meta)	Feed · Stories · Reels: read per ad every week (we run 4:5 only)

This lets us answer: *Which hook wins on cold audiences for wallets? Does real phone footage beat lifestyle on warm audiences? Do 4:5 ads sell in Stories?* A pattern only counts once it has won in **two or more ads**.

5 · When to stop, when NOT to stop, when to scale

Break-even is per product: profit per order placed, after cost, delivery and that product's refusal rate. It is refreshed with Aug–Oct data before the first weekly read (e.g. Mocha Mate ≈ 990, gloves 1,000, Aristocrat ≈ 3,000).

Situation	Decision
New ad, spent less than its break-even, no sale yet	**Keep.** Too early.
Cold CTR below 0.6% after 3,000 impressions	**Stop:** the hook failed.
Clicks and add-to-carts, but no sale yet	**Keep** up to 2× break-even.
1.5× break-even spent, 0 Shopify orders	**Stop.**
7-day cost per order above 1.3× break-even	**Stop**, or move a trust ad to a warmer tier.
A winner has 1–2 bad days	**Keep.** Judge on 7 days, never on 1.
7-day cost per order ≤ 0.7× break-even with 3+ orders	**Scale** +20%, then wait 72h.

Seen too often (frequency >3 cold / >6 warm) and CTR down 30%	**Refresh**: new creative, same winning hook.
Refusal rate 10+ points above average (day 14)	**Stop** even if it looks cheap.

Always: one change per ad set per 72h, batched; never judge an ad set without listing every ad in it; every pause or scale goes to the Founder as a per-ad table for a yes.

6 · How often we look

When	What
Every check-in	Problems only: an ad over 2× break-even with no orders, spend not delivering, WhatsApp bridge down.
Every Monday	Full per-ad 7-day table: Meta + Shopify + cost per order vs break-even, plus breakdowns by placement, age/gender, city, device, and the format/hook/style roll-up. Recommendations go to the Founder for a yes.
Day 14 of each ad	Refusal rate joined to the ad (the truth column).
1st of each month	Scorecard → Creative Playbook (proven / lost / next tests).

7 · Blessed Friday inside the funnel (26–30 Nov)

BF · Warm (1,200/day)

Visitors 180D + viewers 90D

Carousel (10-card range) · R1 Receipt · R3 "Too expensive" · Our Mistake · Ladies Clutch static

BF · Cold (800/day)

Top-tier exclusions

Carousel · R1 Receipt

All tagged `bf_…`. The Dec 1–3 read answers: receipt vs objection vs carousel vs "our mistake", warm vs cold, Feed vs Stories. The winners join the playbook; the tiers keep running underneath and BF stops at midnight on 30 Nov.

8 · Timeline

Date	Step
12 Nov, midnight	11.11 ends → funnel campaigns go live (Top + Middle new; Bottom = renamed catalogue retargeting); old duplicates paused. Total 3,000/day.
13–15 Nov	Break-even per product refreshed (CFO) · audience sizes checked (CRO).
17 Nov (Mon)	First weekly read.
23 Nov	Blessed Friday ad sets built as drafts.
26–30 Nov	Blessed Friday live (+2,000/day).
1 Dec	5,000/day; December test calendar begins (FAQ, Ordered vs Arrived gloves, office demos, patina).
14 Dec	First funnel review: step down to a smaller budget if cost per order is above 1,300 or revenue is below 2× spend.
